MINING, BUSINESS AND STOCKS.

MAKES INSPECTION OF TINTIC CENTRAL

Manager A. N. Holdaway Advances Somewhat New Geological Theory.

A. N. Holdaway, manager of the Tintic Central, made an inspection of the property on Saturday last and he says that the developments there are but a justification of his theories relative to the formation and structure.

The shaft, he says, is now at depth of 990 feet, the last 150 feet of which has been in a vertical fissure in the lime. It is Mr. Holdaway's theory that the main channel of the Colorado-Sioux-Iron Blossom ore body strikes continuously south, keeping the course that it has taken since being opened up. This he declares to be a big break, a result of the uplift of the mountains to the west, and that cross breaks cutting this channel are numerous, the ore body getting larger and better at these breaks, but that the north-south channel is the main min-

In the Tintle Central the owners be-lieve that the break encountered is the same that makes the big ore channel. Drifting north 25 feet on the 870-foot level Mr. Holdaway says that they showed the intersection of this north-south fissure with a cross break paral-lel to the cross breaks in Iron Blossom and those in Sloux. In drifting 50 feet east on this level the drift showed the broken formation continuously with tale and some copper stains. It is the intention of the company to push this drift across the fissure in the hopes of encountering a solid formation. In the Tintle Central the owners be

drift across the fissure in the hopes of encountering a solid formation.

That ore will be found, but at depth, seems to be the keynote of the company's operations. The shaft at the present time shows silicified lime on the west or footwall and the bottom is in limestone coated with spar and with considerable manganese present. Some small assays show occasionally, but the company is going to sink deeper in hopes of getting into a more solid formation and one which in their estimation will be too deep to have been leached or altered in any way.

SLUMP CONDITIONS.

Uncle Sam Selling Off to 55 but Grand Central Picking Up.

The market continued its slump this morning with Uncle Sam selling off to 55 and closing at that price in spite of the fact that its new ore body continues strong, Grand Central which has been lagging behind of late sold at 93 and closed with that price bid. One week age this sold as low as 70. One week age this sold as low as to.

Iron Blossom has not recovered from
its setback but some hopes are still
entertained that it will close a contract for the siliceous ores. In the unlisted stocks there was no trading,
but Bingham Copper and Bingham
Central Standard were both 15 bid and 16 asked while Opex closed at 18 bld

16 asked while Opex closed at 18 Did and 18½ asked.

The total number of shares sold on the regular board was 29,300 and son the open board, 5,400, making a total of 34,700 with a value of \$5,498.00. FORENOON QUOTATIONS.

UTAH-APEX ANNUAL.

Condition of the Mine and Its Finances Shown to Stockholders,

Shown to Stockholders.

The annual report of the Utah-Apex has been mailed to the stockholders and shows the reports of the officers for the year ending Sept. 1, 1910. The financial statement shows the net profit from ore sold during the year amounted to \$109,194.78. The expenses were \$160,-346.73. The cash on hand Sept. 1 was \$34,245.18. The cash on hand Aug. 1, 1910, amounted to \$55,297.13.

General Manager Oliver states that the tonnage of the mill is about 200 per day, the ratio of concentration being 3.88 tons into one, the saving being 77.44 per cent. Manager Oliver and Engineer Jennings estimate that during the past year a large tonnage of lead ore was opened and explored, giving 111,500 tons available.

The following extracts are taken from the report:

The following extracts are taken from the report:

We stopped shipments of ore on Aug. 1; 1909; in order to enlarge the mill and complete the upraise to the Andy incline. With these undertakings completed, first shipments were made early in December and have continued with pleted, first shipments were made early in December and have continued without interruption. Mill capacity has been gradually increased to approximately 200 tons per day.

An important feature of the year's progress has been the opening up of fissures and bedded veins in the western portion of the property on the fourth level. These bodies are continually enlarging and promise supplies of ore for

level. These bodies are continually en-larging and promise supplies of ore for a long time to come. Development on the lower levels has not been neglected and much is expected of our No. 7 level, which is now in 500 feet. Development work during the year included 1,545 feet of drifting and 373 feet of ruless in addition to which sta-

feet of raises, in addition to which stacutting amounted to 20,767 cubic A total of 293,945 cubic feet of ore

was stoped.

During August the mill treated an average of 189.9 tons of ore dally. The average saving on lead for the eight months was 77.44 per cent, the average ratio of concentration for the pust mine months being 3.88 into 1. Average milling cost during the same period was

In January we completed the pur-chase of the Phoenix property by ac-quiring practically all the outstanding

Since the preparation of the above report two important ore discoveries have been made at the property, viz., in the south branch of the Parvenu tunnel, where a fine body of silver-lead ore was found; also in the raise from the new No. 7 level, where a good showing of copper ore has been en-

In view of these discoveries Utah-Apex will expand its development work, and to this end the mill has been shut down temporarily in order that sufficient compressor capacity may be had

AT THE IRON BLOSSOM.

Dr. J. E. Talmage Tells of Some Recent Important Discoveries.

Dr. James E. Talmage, director of the Deserct museum spent last week in Tintic on professional work and during that time was a visitor in the during that time was a visitor in the fron Blossom cave, which was recently opened up below the 400 foot level and south of No. 3 shaft. Dr. Talmage considers the discovery of this cave as one of the most important ever made in that section as to its relation to the structure of the ore-bearing formations. "Some of the best calcareous deposits discovered in the west are to be found in the cave," said Dr. Talmage, especially some of the feathery lime crystals which adorn the walls. I am arranging to make a walls. I am arranging to make a return trip especially prepared to secure some of the more valuable specimens for the Deseret museum and to place them there for exhibition."

POSSIBILITIES OF AMERICAN FORK CANYON

W. C. Boley, Who Is Operating in That District, Hopeful for Winter's Work,

That American Fork canyon will be the scene of renewed activity in mining and that this winter ought to develop large ore bodies is the opinion of W. C. Boley who is operating in that dis-Under intelligent direction, he is of the opinion that the camp will be a large producer of lead silver ore. Together with his associates, Mr. Boley is working on the Mary Ellen group. In speaking of the work Mr. Boley said this morning:

The Mary Ellen group lies in Mary Ellen gulch south of the old Yankec, on which John Cleghorn has taken bond and lease. The formation consists principally of quartzite and lime with the lime as a capping. There are strong fissures cutting throughout the entire district, the largest and those that are known to be the principal ore bearing ones striking northeast-southwest. These are considered as the main ore channels. Cutting across these are numerous east-west fissures. At the intersection of the two, the ore spreads out and large deposits are found. The biggest and best bodies are found in the black lime, especially where the intersections occur in this lime.

"The Mary Ellen is developing by a tunnel running west and cutting the northeast-southwest fissures at right angles. The present tunnel has cut six of these to date, the largest of which is about four feet wide. These are ore bearing in places, carrying values in gold, silver and lead. It is the intention of the company to drift along these fissures and open them on the strike. The tunnel now has a depth of 400 feet and when completed will be 1,000 feet below the surface."

The property of the Mary Ellen Min-

ing and Milling company consists of 13 claims, patent for which has been applied for. Several fissures show on the surfact and these are to be developed at depth.

SALES MANAGERS UNITE.

Hold Meeting This Afternoon to Form Organization.

There was a meeting between repre sentatives of the wholesale, jobbing and sentatives of the wholesale, jobbing and manufacturering houses of Salt Lake and D. F. Parker, member of the executive committee of the National Association of Sales Managers, this afternoon in the Vermont building, for the purpose of forming a local branch of the association in Salt Lake. Arrangements for the meeting were made yesterday at an informal meeting held at terday at an informal meeting held a the Commercial club.

Joseph E. Caine, secretary of the club offered Mr. Parker the club rooms for the meeting ond assured him that the club would be willing to give them any assistance possible. Owing to the confusion of moving, the sales man-agers at the instance of J. G. McDon-ald decided to hold their first meet-

and decided to hold their first meet-ing at the headquarters of the Utah State Fair association.

Mr. Parker, was a former resident of Ogden and is manager of the agency department of the Herring-Hall-Marvin Safe company. In connection with his travels, which take him from Maine to California, twice each year, he is or-ganizing local branches of the organi-The organization has no being carried on for the mutual benefit of the members. Mr. Parker said that at present there were nearly 50 branches of the organization and the idea of forming a national association was first Successed as a meeting recently held in

The organization sends out a magazine every month on the science of salesmanship and also information of reperal interest to the wholesale houses Under the present form of the organiza-tion only one man from each firm is allowed a membership.

FOUND DEAD ON TRACK.

Found lying dead on the tracks of the Denver & Rio Grande, with both hands cut off, the body of an unidentifled man was found at 2:30 this afternoon. The body was lying between noon. The body was tying between the rails just outside the city limits near the plant of the Intermountain Packing company. The sheriff's office was notified and Sheriff Sharp sent several deputies out to the scene in an automobile.

PERSONALS.

Miss Sybella Clayton and Miss Hortense Kimball sail again from New York Tuesday, on the steamship George Washington. The boat on which they had sailed was obliged to put back be cause of a collision. The boat on which they

Prof. L. A. Merrill, state agronomist, is expected to return tonight from Cali-fornia, where he has been for the past 10 days inspecting farms.

A. C. Nelson, state superintendent of public instruction, went to Price Sun-day to attend the Carbon county teachers' institute. He will return Tuesday or Wednesday.

H. D. Folsom, Jr., of Seattle, is visiting in this city with his mother, Mrs. Barbara E. Folsom.

SPIKE AND RAIL.

The O. S. L. inspection train com-The O. S. L. inspection train com-pleted its annual trip Sunday, after two weeks' travel of 5,000 miles. The party found the entire system in excel-ent condition, showing up well in com-arison with the other Harriman lines. parison with the other Harriman lines.

Colonel and Mrs. I. A. Benton have returned from a nine days' absence in California. They were more than pleased with the wonderful scenery along the Father river, which they in common with other travelers consider superior oven to the best Colorado scenery. At one place where the train was running several thousand feet up the mountain side, they could look down on the stream at the bottom of the canyon, where deer were drinking. A blast from the whistle, and off they were up on the opposite side like a flash. The entire trip was one of unalloyed pleasure. alloyed pleasure.

J. E. Sexton, assistant to the presi-dent and traffic manager, Quincy West-ern rallway of California is a visitor

LOCAL MARKETS

Today's local market receipts include fine Moapa lettuce, Idaho potatoes, selling at \$1.25 per cwt., Utah potatoes at \$1.15, a car of onions at \$1.50 per cwt., any quantity of apples, oranges wholesaling at \$3.75 and \$4, and the usual run of winter vegetables from the east and the south. A morning the retail grocery trade against the jobbers and commission men who are made out to be wholesale reachers after unconscionable profits. Members of the branch of the trade thus por rayed call attention to the fact that while a box of oranges does cost \$2.25 in California, the express charges amount to 75 cents, while in repacking, the loss is sometimes as high as \$1 per box, as if a box containing any ap-parently unsound oranges goes out, it is sent right back by the retailer; and the same is true of lemons and tomatoes. As for figures covering cost in California, the claim is advanced that the fruit sold locally there consists largely of culls and such as is not desired to be shipped out. Moreover, the general grablic does not seem to the general rabble does not seem to realize that expenses of doing business now is from 7 to 9½ per cent higher than even three years ago. Where profits of 5, 6 and 7 per cent were ample, a few years ago, it is necessary now, if the jobber is to pull through, to clear 12 to 15 per cent profit, As the claim that lemons cost. in California \$4,40 per box, it is claimed per contra, that the actual cost there is \$7 in car load lots. Strictby fresh eggs are up to 45 cents. There is pienty of fish goods in the market, and a fair quantity of poultry, as well as seasonable products generally. The quotations obtaining today, are as follows:

DISTRICT COURT NOTES.

John A. Jones, who slew Arthur F. Sheppard on July 19 and was acquitted this month by a jury on the "unwritten law," obtained a divorce from Velmay Cowdin Jones in District Judge Armstrong's court Saturday on the grounds of cruelty after failing Friday to get a decree on the grounds of infidelity. The couple were married here July 15, 1902. The cruelty consisted of seeking the company of Sheppard and causing Jones mental suffering.

An order was formally entered Saver

causing Jones mental suffering.

An order was formally entered Saturday in District Judge Armstrong's court dismission the county attorney's suit agrilest the commissioners to compel them to return to the county treasury \$5,727,50 illegally paid to the old Intermountain Republican for the publication of the 1998 delinquent tax list. County Atty. Job P. Lyon and his assistant, John Jensen, are busy perfecting the appeal to the supreme court. Joshua A. Worthen of 725 south Saturday.

ling the appeal to the supreme court.

Joshua A. Worthen of 725 south Second West street, has applied to the district court for letters of administration on the estate of his mother, Mary E. Midgley Worthen, who died here intestate Nov. 11, this year, leaving realty in the city and county with a yearly rental value of \$250. Including the petitioner there are five heirs.

In a suit filed in the district court, Caroline Sundquist demands \$10,000 damages for personal injuries of the Utah Light & Railway company. The woman says that the motorman started the car too soon, as she was alighting from it at Third East and Third South streets, Nov. 7, throwing her to the ground and breaking her left arm.

Mrs. Maggie Larsen was adjudged in search.

Airs, Maggie Lairsen was adjudged insene by an insanity commission in District Judge Lewis's court and ordered committed to the state mental hospital at Provo.

HARLEY AMONG THOSE STUNG.

Is Now Encumbered With a Watch He Does Not Want Particularly.

C. T. Harley, formerly of this city

now of Richfield, and in the city on a visit, dropped into a south State street auction parlor this forenoon and he now wears a mournful look and in his vest pocket reposes a watch, a watch he bought at auction and which watch he bought at auction and which he wishes now he had not bought, and the longer he has the watch the more he will wish it, if his story told to the police is as heartfelt as it sounded.

Mr. Harley was lured within the auction parlor by the raucous tones emitted by the "spieler" within the sale room. The bidding for a watch that looked pretty good to Mr. Harley was spirited and it "went to the gentleman there"—meaning Mr. Harley, for \$10. He also meaning Mr. Harley, for \$10. He also obtained a lady's watch in much the same manner. After having them, all for his own, he examined them and was soon dissatisfied with his bargain. He remonstrated with the auctioneer, saying that the watches were not what they seemed at long range. Then the they seemed at long range. Then the auctioneer—just what he was waiting for, apparently—began a deal with Mr. Harley to take the two watches back and with them \$5 additional and in return to give him a Howard watch, "the best in the world, unless you take a Rockford," said the auctioneer. Mr. Harley thought he would take a Rockford, and that is what he got. It appears to be ball bearing, with two speeds, a muffler which, when cut in, muffles the sound of the ticking so that it cannot be heard more than a few rounces the sound of the texting so that it cannot be heard more than a few rods away. With regular oiling and an occasional tightening up of bolts, seriews and gears, it would seeem to promise fair service.

Mr. Harley applied to the police for relief, but it appears that there is fittle likelihood of any being afforded, for the ones versed in the law at the city hall say that the auctioneers have kept within the margin by recourse to tricks well known to their trade. Mr. Harley now lists himself as "among those stung."

DALTON ADDRESSES SOCIALISTS.

W. F. Dalton, assistant city attorney, addressed the Socialist meeting at Hirshman's hall last night, taking as his subject the general consideration of economics. He interested a large of economics. He interested a large absence in his discussion of values, ex-change, wages, capital, labor and other topics coming under his subject. He occupied the rostrum in the absence of William T, Brown.

RAILROAD NEWS

MAY VIEW FEATHER RIVER.

Western Pacific Inaugurates Afternoon Service Out of Salt Lake. The Western Pacific road inaugurates Sunday next, Nov. 27, the afternoon westbound service promised. The train leaves on and after that date at 2:45 p.m. from this city, connecting with No. 1 on the Rio Grande due here at 1:26 p.m. from Denver. A 10-section 130 p.m. from Denver, A 10-section observation car will be attached to this train, thus enabling tourists to see the south shore of the great lake, the vast salt beds in the western part of the state, that afternoon, and on the next day, the marketern part of the day the marvenus scener. Feather river in California. The observation cars will be attached to the westbound train from Denver, running day the marvelous scenery along the straight through to the coast.

AGAIN THE MOFFAT ROAD.

Denver, Nov. 19.—A letter written by William G. Evans, vice president of he Denver & Northwestern railroad the Denver & Northwestern railroad (the Moffat road) and addressed to David Moffat, president of the road, which was made public, is interpreted by many as indicating more clearly the likelyhood of the Moffat road using the Denver & Rio Grande tracks to reach alt Lake.

Salt Lake.

The letter speaks favorably of the suggestion that the Moffat road build a cut-off from Crested, on the Moffat road, to Dotsero, on the Rio Grande This has been spoken of as a possibility many times, but never before has it received anything like official approval until today.

Mr. Evans refers approvingly also to the proposal to build a tunnel through the main range of the Rockies from Tolland, asserting that Is miles of distance could be done away with, as well as a 2,000-foot climb, which is neces.

tance could be done away with, as well as a 2,000-foot climb, which is neceseary now. This tunnel, Mr. Evans says, has been recommended by experts who estimate that it would cost appreximately \$4,000,000.

Should the Moffat officials decide to build the cut-off to Dotsero, in all probability the original plan to build a separate line into Salt Lake would be abandoned, and the main line of the Moffat road ended somewhere in Routt county, Colo.

WANT NEW RATE. Millers are endeavoring to secure a milling in transit rate from Idaho shipping points for this city, which means
